ISO 9001 - 2015  
ISO 14001 - 2015

**EEC Group** has been fabricating a variety of steel structures **since 1982** to complement its engineering and construction divisions and to support the growing needs of customer projects in **Egypt ,Africa** and the region ,spanning several **sectors**:

- Industrial Complexes.
- Commercial Malls.
- High Rise Buildings.
- Bridges & Tunnels.
- Overhead Crane Girder Structures.

EEC is capable of producing beams with the following specifications:  
Web Height up to **2,000mm** with maximum thickness of **35mm**.  
Flange width up to **1,000mm** with maximum thickness of **40mm** Beam.  
Length up to **15,000mm**.  
Tapering **up to 20°**.

We can produce several types of beams.

**Tapered, Hunched, I-, H-, L-, wide flanged and non symmetrical**  
Box sections up to **1200mm x 800mm** for overhead structures.

We offer a full service to cover **Design, Fabrication, Finishing, and Installation**.

We have different finishes available that include standard or **epoxy paint systems** and **hot-dip galvanized**.
