G r o u p

Since 1975

EEC Group has been fabricating a variety of steel structures since 1982 to complement its engineering & construction divisions and to support the growing needs of the customer projects in Egypt, Africa and the region, spanning our chosen sectors:

- Industrial & Commercial Constructions
- Power & Energy
- Telecommunications

We can provide a full engineered solution from design, fabrication and installation as per the client's requirements.

Today our steel structures factory, with a capacity of 3500 tons per month, forms part of a manufacturing complex spanning 140,000 m² producing the highest quality structures according to international standards and specifications, using the latest in automation and CNC technologies.

We produce a wide range of steel products for many applications:

- General steel structures & trusses for the Commercial and Industrial sector (Factories, Warehouses, Malls and Administration Offices).
- Steel towers & gantries of all heights and types for the Telecom and Power Transmission.
- Supporting sub-assemblies (Stairways, Handrails, Fencing).
- Trailers for the mobile telecom solutions.

We also can provide hot-dip galvanization and cladding products such as single skin corrugated sheets and polyurethane sandwich panels that provide you with a complete "one-stop-shop" solution.

EEC Group was founded in 1975 as a construction company.

Today we are positioned uniquely in Egypt and the region, capable of delivering integrated value to our customers on a turnkey basis through our engineering, construction and fabrication capabilities with over 1500 professionals

We operate an Integrated Management System for ISO9001, ISO14001 and OHSAS18001
